Galaxy M.ECARG was formed approximately 26 billion years ago. It was named after Grace M. (spelt in the reverse order), a budding 11-year-old astronomer who discovered it while she decided to reverse her foot-standing observation position to a hand stand on February 6th, 2017. Galaxy M.ECARG contains the following 12 planets:

10	Pentalope	A planet initially formed by five governing factions but was eventually unified by Bea Divergent. The Pentalopers embrace diversity and versatility and are known for their open-mindedness and well-roundedness. Pentalope now serves as the central government of the Galaxy.
